

SHAPING THE FUTURE OF INTELLIGENCE.

Full-Stack Developer

Reference: PLTD-FSD-2021-12 | Limassol (Cyprus)

Your tasks

We are looking for a Full-Stack Developer to join our Scrum teams to take over the following tasks and responsibilities:

- Design, develop, test, and debug responsive web applications
- Accurately translate customer requirements and UX designs into functional code
- Create features based on Java and ReactJS
- Build reusable code and maintainable libraries for future use
- Collaborate with stakeholders and other members of the Plath Group

Your profile

- BSc / MSc in the areas of Computer Science related fields
- Passionate about coding and software development
- Enjoy working as a team player in an Agile environment.
- 2+ years of professional experience in web development
- Willing to learn and continuously grow
- Knowledge desirable in Java, JavaScript, TypeScript, ReactJS
- Understanding of architecture (REST APIs, microservices, etc.) and knowledge of SQL
- Fluent in spoken and written English.

Interested? Apply now!

We look forward to receiving your application in English. Please send your documents incl. Ref.-Number to careers@plath.com.cy

PLATH Ltd
Kifisias 1 street | 4003 Limassol (Cyprus)
www.plathgroup.com

Who we are

PLATH Ltd is a subsidiary of the German PLATH Group, a powerful network of high-tech companies and one of the leading international providers of high-quality systems in the field of communications intelligence. PLATH Group companies provide customers with innovative systems and products on the basis of nearly 70 years of industry experience – and help them make the world a safer place.

Great reasons for working with us in the future

- Working together with great colleagues in a growing team
- Exciting and motivating work environment
- Hybrid working scheme
- Position in a company with growth potential
- Stable foundation from being a member of the PLATH Group
- Attractive remuneration package
- Private health insurance
- Provident fund
- Gym membership
- Continuous personal development scheme (certifications, conferences, online learning platforms, on-site trainings)
- International relocation bonus (if applicable)

Junior Java Developer

Reference: PLTD-JD-2022-01 | Limassol (Cyprus)

Your tasks

As a Junior Java Developer, you will participate in the implementation of a real time platform for the automated interception, analysis and visualisation of radio signals.

We will train you how to develop high quality software using modern software development principles like clean code, test driven development, SOLID principles and design patterns.

Within your team you will follow Agile software methodologies like Scrum, Kanban and practice Extreme Programming principles.

Your profile

- BSc / MSc in the areas of Computer Science related fields
- Passionate about coding and software development
- Enjoy working as a team player in an Agile environment
- Willing to learn and continuously grow
- Basic knowledge desirable in an OOP language like Java, .NET or C++
- Fluent in spoken and written English
- Professional experience will be considered an advantage

Interested? Apply now!
